THE WORLD GAMES 2017

- eNavigator was used to create the event website for the competition and allowed to publish scores, news, schedule, athletes biographies and pictures to the general public.
- eNavigator was used as a management and communication tool between athletes and organizers.
- In Paramotoring and Glider Aerobatics, eNavigator was used to process and display performance results.
- For all Canopy Piloting, Paramotoring and Glider Aerobatics, eNavigator was used to send official scores to Swiss Timing in the Olympic data format.

NOOSPHERE COPTER RACE 2017

- eNavigator was used to create the event website and provides a full set of participants management routines.
- New modules allowed eNavigator to support both single and double elimination tournament grids.
- eNavigator was connected to a hardware scoring system developed by the Noosphere Engineering School, which allowed to get performance results automatically.
- Additional modules allowed eNavigator to not only display scores live, but also provide live titles for online video broadcast.
